Green Energy Solutions

CIWM EXHIBITION APPEARANCE FOR MBT, RO AND AD HAASE PRODUCTS

Clarke Energy and Haase Energietechnik returned to the CIWM exhibition in Torbay to promote a number of waste management solutions. Exclusive to this years exhibit was a Reverse Osmosis (RO) containerised wastewater treatment module. The RO container was en-route to a Landfill site as the first of many UK installations.

The exhibition proved a success in promoting new to the UK Haase products, such as the RO container, but particular interest was shown in the Mechanical Biological Treatment (MBT) plants. The Haase MBT installations offer sustainability utilising Anaerobic Digestion (AD) for bio-waste producing energy recovery in the form of electricity and heat. This alternative to the current composting/incineration options proved popular with numerous councils and consultants, and has led to significant interest across the UK. Clarke Energy is looking forward to further growth with the Haase products that are state-of-the-art waste management solutions.

Stand N56a – North Green – CIWM Exhibition, Paignton, Torbay

Note:-

Clarke Energy Limited is a leading worldwide Energy Systems Company offering a wide range of green power generation solutions with offices in Australia, France, India, Nigeria, New Zealand and UK. Clarke Energy employs over 200 people worldwide and operates as part of the Clarke Group.
