

CLARKE TELECOM ACQUIRES INFRATEC

The Board of Directors is pleased to announce that Clarke Group has acquired the shares of Infratec as part of the ongoing development of Clarke Telecom.

The Clarke Group was established in 1989 and our other activities include design, supply and turnkey installation of green energy power stations in the UK and 6 other countries.

Acquisition of Infratec will take the group's turnover to around £125 million with a permanent staff of well over 500 personnel.

Clarke Telecom and Infratec both enjoy strong reputations for quality and "can do will do" performance, and I have found the character of Infratec's business and its directors to be beyond reproach.

We are looking forward to the challenge of integrating the businesses over the next few weeks and the new enlarged Clarke Telecom will be in a strong position to supply all aspects of infrastructure to Mobile Phone Operators from Site Acquisition, Design and Build to Rigging, Commissioning, Metering, Optimising, Power Provisioning and Site Maintenance.

The Boards of both companies take this opportunity to thank you for your business and loyalty to date.

We realise that we have no business without you and recognise that your expectations for our new organisation will be high. Our goal is to exceed those expectations.

Please contact us if you have any questions whatsoever and we are at your disposal to visit you to fully introduce you to Clarke Telecom and its new capabilities.
