Green Energy Solutions

CLARKE ENERGY RETURNS FOR HORTEX2000

Clarke Energy, one of the UK's foremost turnkey suppliers of gas-powered generators, returns to HortEx to underline the benefits of its combined heat and power (CHP) systems for the greenhouse industry.

Clarke Energy is the UK's exclusive distributor of Jenbacher high efficiency gas engine generators for CHP, which, allied with the company's reputation for on-time installation and 24 hour service, give it a highly competitive advantage in the greenhouse market. The company installs, maintains and operates purpose-designed systems, which can be financed without any capital outlay from the greenhouse owner.

Clarke Energy has gone on to secure several important horticultural contracts, including the 36MW Wight Salads project on the Isle of Wight (pictured above), the largest ever CHP order in the European horticulture industry.

These projects, the general efficiency benefits of CHP in large greenhouses and the significantly increased yields of produce resulting from the power generation's heat and carbon dioxide by-products, are all themes which will be reflected on Clarke Energy's stand at HortEx.

Note:-

Clarke Energy Limited is a leading worldwide Energy Systems Company offering a wide range of green power generation solutions with offices in Australia, France, India, Nigeria, New Zealand and UK. Clarke Energy employs over 150 people worldwide and operates as part of the Clarke Group.
